WE'RE ALL ABOUT
INNOVATION

WHY CLIENTS CHOOSE CENTURION

- ✓ Innovative products at the Leading Edge of Industry Technology
- ✓ Premium Quality Doors manufactured using Genuine Australian Made BLUESCOPE steel
- ✓ Australian Owned and operated since 1976
- ✓ The largest privately owned and operated Garage Door Company in Australia

STEVE CANNING

MARK CANNING

Family owned and operated since 1976

Australians are famous for their innovation and we at Centurion Garage Doors are proud to be the leader in our field producing quality 'leading edge technology' in garage door products.

Our latest innovation, the revolutionary 'Quick-Fit' garage door is the culmination of over

10 000 hrs of research and development by our engineering team, arguably the most significant advancement in the garage door industry since the invention of the humble roller door. The 'Quick-Fit' door is set to reinvent the garage door industry.

Read on to find out more...

STRONGER! QUIETER! MORE HEIGHT! QUICKER INSTALLATION!

OUR FACTORY

We have recently completed commissioning the most advanced garage door manufacturing plant in Australia, designed from the ground up, to efficiently manufacture our unique 'Quick-Fit' garage door.

Whilst others are shipping jobs off shore, we are investing in Australia and Australian jobs.

Our new 'Quick-Fit' garage door is manufactured exclusively from genuine Australian made Bluescope Steel and combined with our in house quality control and manufacturing systems, ensures our customers are delivered a premium quality product.

OUR DOOR

At the heart of the 'Quick-Fit' garage door is our unique patented 'Pivot Lock' hinge system. This system sees the door hinges installed within the door panel in a factory controlled environment.

A further advancement is our new 'Strong Strut' which is fitted to the top and bottom sides of the door panel. This technology creates better load distribution and is fully bonded to the panel creating a system up to 40% stronger than ordinary doors.

Our competition leave the installation of struts and hinges to the on site installer resulting in inconsistent quality and product performance.

This coupled with our patent pending 'tuff track' and patent pending 'click and go track curve' provides a door that is much neater in appearance, stronger, quieter, gives you more drive through height and can be installed in less than half the time of ordinary doors.

Minimising the disruption to our customer's homes and delivering a higher quality door.

Centurion's CLICK and GO track curve (Patent Pending), fast installation, super strong and quieter operation, with greatly reduced maintenance.

Centurion's unique TUFF TRACK (Patent Pending), up to 50% stronger than normal tracks and our factory pressed Bracket system for a neat and professional looking installation.

HOW WE COMPARE

	FINGER SAFE TYPE DESIGN	BUILT IN HINGE DESIGN	CONCEALED STRUT	STANDARD HEADROOM OF 240mm	REINFORCED TRACK DESIGN	CLICK IN SPRING SYSTEM	SUPER FAST INSTALLATION	STRUT FULLY BONDED TO PANEL	100% GENUINE BLUESCOPE STEEL	FULL HEIGHT SIDE SEALS	
CENTURION QUICK-FIT	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	10/10
ORDINARY DOORS	✗	✗	✗	✗	✗	✗	✗	✗	✗	✗	

Centurion's unique new ROLLER CARRIER (Patent Pending) allows quick and simple installation of door rollers, no metal on metal contact for smoother, quieter operation.

At the heart of the Quick-Fit door is the revolutionary new patented PIVOT LOCK hinge system. This factory fitted hinge allows super fast installation and is manufactured from the latest in glass reinforced nylons giving extremely high strength to weight ratios, whilst delivering a smoother and quieter operating door.

The fantastic new TWIN STRONG STRUT (Patent Pending), concealed within the door and bonded to the full length of the panel makes the door panel up to 40% stronger.

All Centurion quickfit doors now feature exclusive SIDE WEATHER SEALS, these seals fit the full height of the opening and are designed to fill the gap between the wall and the door panels, Optional extras with others, standard with Centurion.
